

Preventive Drug Benefit

Your prescription drug coverage features the Preventive Drug Benefit, which includes medications to help prevent chronic conditions and illnesses. The Preventive Drug Benefit enables you to access many covered preventive drugs that are not subject to your plan deductible. That lowers your cost sharing, as you won't have to satisfy your deductible before receiving coverage. However, you will be required to pay the applicable copayment or coinsurance amount for the drug.

Below is a list of the most commonly prescribed drugs to help prevent chronic conditions and illnesses. Brand-name drugs begin with a capital letter; all others are generic. Over-the-counter products are not included in this benefit. This list is not all-inclusive, and limitations and restrictions may apply.
