Preventive Medication List

Preventive care benefits are an essential part of a comprehensive health plan. That is why under many of our Saver plans, you may not be required to pay the overall deductible for certain preventive prescription medications.¹ Below is a list of the most commonly prescribed preventive prescription medications. The list is not all-inclusive and does not guarantee coverage. Not all medications are covered by Blue Cross Blue Shield of Massachusetts and some medications may be subject to formulary management programs such as Step Therapy and Quality Care Dosing. If you have questions regarding your benefits for preventive prescription medications, please call Member Service at the number on the front of your ID card.

This list is up-to-date as of January 1, 2016.
